

Daisy Wholesale DSL

World class connectivity

Daisy Wholesale LLU Wholesale Broadband

Introduction

Daisy Wholesale have invested in a comprehensive suite of LLU based broadband services for the channel. Our LLU network ensures that our partners can offer their end users a broadband service that is resilient utilising both LLU and the more traditional 20CNBT IP Stream Services.

LLU xDSL

The Daisy Wholesale LLU ADSL products come in a number of speeds. Firstly there is the "up to" 8Mbit/s LLU Max. The upload speeds for the LLU ADSL Max products are a replica of those on offer with BT IP Stream providing 448Kbit/s and 832Kbit/s for Standard and Premium connections respectively. The higher speed ADSL2+ (Annex A) provides "up to" 24Mbit/s or 16Mbit/s downstream (depending on the product) and "up to" 1Mbit/s upstream. These products are available in home and business variants.

LLU Annex M

The Daisy Wholesale LLU Annex M services extend the capabilities of standard ADSL2+. By amending the split of the downstream and upstream frequencies, it is now possible to obtain rate adaptive speeds of up to 16Mbit/s downstream and up to 2.5Mbit/s upstream. The services are positioned as a replacement for ISDN and SDSL services and are ideal for bandwidth intensive, converged applications such as Voice over IP, video conferencing and hosted applications.

LLU SDSL (M)

The SDSL (M) range of services is based on ADSL2+ technology but delivers symmetric bandwidth. Assured bandwidth means that these Annex M services provide end users with a symmetric 1:1 service at a considerably lower cost than would usually be associated with SDSL.

LLU SDSL

The Daisy Wholesale LLU SDSL services are available in 512Kbit/s, 1Mbit/s and 2Mbit/s variants with contentions of 5:1 and 1:1. BT IP Stream SDSL is provided with a contention of 10:1 therefore organisations looking for un-contended solutions have traditionally had to invest in higher cost leased line circuits. LLU SDSL services are the perfect mid range broadband option, between standard DSL services and leased line solutions and are offered with Enhanced Care support inclusive in the monthly recurring rate delivering a 20 clock hour fix in the event of a fault.

Availability

LLU xDSL, LLU, Annex M and LLU SDSL (M) is available across over 2000 exchanges throughout the UK. This is over 80% of the population.

LLU SDSL services are available across over 830 exchanges throughout the UK. This is over 40% national coverage and 50% of the UK's business population.

The Benefits

- ✓ Resilient
- ✓ Low cost packages
- ✓ Uncontended bandwidth options
- ✓ Alternative to traditional SDSL services
- ✓ XPS portal

helping your business *grow*
